# Abhilash Maurya

Ghaziabad (Delhi-NCR), India
abhilash.m.git@gmail.com - 7880764235 - LinkedIn - GitHub

## Skills

**Languages:** Python, C++, JavaScript, SQL
**Libraries and Frameworks:** FastAPI, Django, LangChain, React, Next.js, Express.js
**Databases:** PostgreSQL, MongoDB, MySQL, Redis, Vector Databases, Firebase
**Tools and Platforms:** Docker, Git, Linux, AWS, Azure, GitHub Actions, RAG Systems, AI Agents

## Work Experience

**AI/ML Coordinator** *Nov 2023 – Present*
*Innogeeks Club, KIET*

- Led development of 5+ AI and full-stack MVPs, driving architecture decisions, backend implementation, and deployment workflows.
- Mentored 6+ developers in Python, FastAPI, machine learning, and hackathon project development.
- Coordinated agile teams of 3–6 members across multiple hackathons, delivering production-ready prototypes under strict timelines.
- Contributed to project design reviews, API planning, database modeling, and deployment strategies.

## Projects

**ChainSentinel AI – Multi-Chain Compliance & Security Intelligence Platform** GitHub
*Python, FastAPI, MongoDB, WebSockets, Docker, Groq LLM, Next.js*

- Engineered an AI-powered compliance platform analyzing smart contracts across Ethereum, Solana, and Aptos ecosystems.
- Developed Python-based static analysis pipelines for vulnerability detection, risk scoring, and compliance assessment.
- Built scalable FastAPI services for contract scanning, report generation, and AI-assisted security explanations.
- Implemented real-time monitoring and alerting using WebSockets and modular API-first backend architecture.

**Quadrant RAG – Retrieval-Augmented Knowledge Intelligence System** GitHub
*Python, FastAPI, LangChain, Vector Databases, LLMs, Docker*

- Built a Retrieval-Augmented Generation (RAG) platform for question answering over custom knowledge bases.
- Implemented document ingestion, chunking, embedding generation, and vector retrieval pipelines.
- Developed FastAPI services for document processing, indexing, and low-latency inference workflows.
- Containerized services using Docker and integrated LLM-based response generation with retrieval orchestration.

**Zen Heaven – AI-Powered Mental Wellness Platform** GitHub
*Python, FastAPI, MongoDB, LangChain, Twilio, React*

- Developed AI-driven wellness services using sentiment analysis and agent-based recommendation workflows.
- Built FastAPI microservices for mood analysis, recommendation generation, and user interaction management.
- Integrated Twilio APIs for automated emergency notifications and safety escalation workflows.
- Achieved 93% sentiment classification precision through iterative model tuning and prompt engineering.

## Certifications

- AWS Certified Cloud Practitioner – Amazon Web Services
- Google AI Essentials – Coursera

## Achievements

- Co-inventor of an IoT-AI Telemedicine Patent (India Patent No. 202511018153A, published April 2025).
- Secured 1st place in a solo AI-agent hackathon track among 500+ participants by developing an end-to-end autonomous AI solution.
- Recognized as a Top 5 finalist in 5+ regional hackathons, delivering scalable prototypes under tight deadlines.
- Contributed to open-source projects including OpenClaw and Gemini CLI, delivering feature enhancements, bug fixes, documentation improvements, and community-driven contributions through global open-source programs.

## Education

**B.Tech in Information Technology** *Expected 2027*
KIET Group of Institutions (AKTU University), Ghaziabad 75.45%
**Relevant Coursework:** Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks
**Intermediate (CBSE)** 80.2%
Maharishi Vidya Mandir
